Browser vs Search Engine

There seems to be confusion among many about the two. A browser is a program that takes the cryptic code (HTML) of the Internet and translates it into the graphic displays we are used to seeing on our screens. Here are some popular browsers: Google Chrome, Firefox, Opera, Internet Explorer (soon to be retired and not working for many web sites), Edge, Dogpile, and more. A search engine is a program that runs in any browser to search for something on the web. Here are some popular search engines: Google, Bing, MSN, Ask, Yahoo, and more.

We spoke about two that are not on the above list:

The BRAVE browser and the DUCKDUCKGO browser

Brave

The brave browser is a fast, private and secure web browser for PC and mobile. it blocks ads and trackers. Download now to enjoy a faster ad-free browsing experience. It blocks invasive ads & trackers and gives you faster, safer, private browsing. Take Control. Browse Faster. Browse with Blockchain. Protect Privacy. Amenities: 2X Faster than Chrome, Malware Protection, Privacy & Anti Tracking, Unparalleled Security.

<https://brave.com/download/>

DuckDuckGo is an internet search engine that emphasizes protecting searchers' privacy and avoiding the filter bubble of personalized search

results. It distinguishes itself from other search engines by not profiling its users and by showing all users the same search results for a given search term. Just enter duckduckgo.com in the address bar of any browser to use it or change its default search engine to duckduckgo.com

Google Photos

I use Google Photos for all my photos which means I do not have to worry about a computer crash or losing my cell phone. And when I run low on space on my phone Google Photos will help me delete images I have saved to the cloud off my phone to free up space.

With Google Photos on your cell phone, all your pictures are uploaded to your Google cloud and at no charge to you. Just download the Google Photos app. Be sure to NOT select uploading in original form or you will be charged against your free 15 GB of space. Videos you take with your phone are also uploaded to the cloud but their size is charged to your 15 G Google Drive.

Many people use Google Photos as their photo backup app.

Nomorobo

***No more annoying
robocalls and
telemarketers.***

Just open www.nomorobo.com and follow the prompts. I have been using it for over a year and receive very few of those annoying calls.
