

Heritage Class Notes 1-5-2018

We covered some tidbits I had put together in a slide presentation with examples.

- Printing a webpage
- Using data from the web in a spreadsheet
- Turning your smartphone into a walkie-talkie
- Backing up your Facebook
- Adding captions to your pictures

Here is a link to that presentation:

We also talked about the importance of backing up your data and even your entire hard drive. Backup. Backup. Backup. And the software is free. We recommend EaseUS and Macrium Reflect as good image backup programs. Here is a link to a good article on the subject:

Here is an article with a number of good keyboard shortcuts for Windows 10.

You can check your property values and more at ccappraiser.com. Open the site and then click record search and then real property values. The less information you key in for the search the quicker the response.
